Preface

These Philippine Bidding Documents (PBDs) for the procurement of Goods through Competitive Bidding have been prepared by the Government of the Philippines for use by any branch, constitutional commission or office, agency, department, bureau, office, or instrumentality of the Government of the Philippines, National Government Agencies, including Government-Owned and/or Controlled Corporations, Government Financing Institutions, State Universities and Colleges, and Local Government Unit. The procedures and practices presented in this document have been developed through broad experience, and are for mandatory use in projects that are financed in whole or in part by the Government of the Philippines or any foreign government/foreign or international financing institution in accordance with the provisions of the 2016 revised Implementing Rules and Regulations of Republic Act No. 9184.

The Bidding Documents shall clearly and adequately define, among others: (i) the objectives, scope, and expected outputs and/or results of the proposed contract or Framework Agreement, as the case may be; (ii) the eligibility requirements of Bidders; (iii) the expected contract or Framework Agreement duration, the estimated quantity in the case of procurement of goods, delivery schedule and/or time frame; and (iv) the obligations, duties, and/or functions of the winning bidder.

Care should be taken to check the relevance of the provisions of the PBDs against the requirements of the specific Goods to be procured. If duplication of a subject is inevitable in other sections of the document prepared by the Procuring Entity, care must be exercised to avoid contradictions between clauses dealing with the same matter.

Moreover, each section is prepared with notes intended only as information for the Procuring Entity or the person drafting the Bidding Documents. They shall not be included in the final documents. The following general directions should be observed when using the documents:

- a. All the documents listed in the Table of Contents are normally required for the procurement of Goods. However, they should be adapted as necessary to the circumstances of the particular Procurement Project.
- b. Specific details, such as the “*name of the Procuring Entity*” and “*address for bid submission*,” should be furnished in the Instructions to Bidders, Bid Data Sheet, and Special Conditions of Contract. The final documents should contain neither blank spaces nor options.
- c. This Preface and the footnotes or notes in italics included in the Invitation to Bid, Bid Data Sheet, General Conditions of Contract, Special Conditions of Contract, Schedule of Requirements, and Specifications are not part of the text of the final document, although they contain instructions that the Procuring Entity should strictly follow.
- d. The cover should be modified as required to identify the Bidding Documents as to the Procurement Project, Project Identification Number, and Procuring Entity, in addition to the date of issue.

- e. Modifications for specific Procurement Project details should be provided in the Special Conditions of Contract as amendments to the Conditions of Contract. For easy completion, whenever reference has to be made to specific clauses in the Bid Data Sheet or Special Conditions of Contract, these terms shall be printed in bold typeface on Sections I (Instructions to Bidders) and III (General Conditions of Contract), respectively.
- f. For guidelines on the use of Bidding Forms and the procurement of Foreign-Assisted Projects, these will be covered by a separate issuance of the Government Procurement Policy Board.

Section VII. Technical Specifications

Notes for Preparing the Technical Specifications

A set of precise and clear specifications is a prerequisite for Bidders to respond realistically and competitively to the requirements of the Procuring Entity without qualifying their Bids. In the context of Competitive Bidding, the specifications (*e.g.* production/delivery schedule, manpower requirements, and after-sales service/parts, descriptions of the lots or items) must be prepared to permit the widest possible competition and, at the same time, present a clear statement of the required standards of workmanship, materials, and performance of the goods and services to be procured. Only if this is done will the objectives of transparency, equity, efficiency, fairness, and economy in procurement be realized, responsiveness of bids be ensured, and the subsequent task of bid evaluation and post-qualification facilitated. The specifications should require that all items, materials and accessories to be included or incorporated in the goods be new, unused, and of the most recent or current models, and that they include or incorporate all recent improvements in design and materials unless otherwise provided in the Contract.

Samples of specifications from previous similar procurements are useful in this respect. The use of metric units is encouraged. Depending on the complexity of the goods and the repetitiveness of the type of procurement, it may be advantageous to standardize the General Technical Specifications and incorporate them in a separate subsection. The General Technical Specifications should cover all classes of workmanship, materials, and equipment commonly involved in manufacturing similar goods. Deletions or addenda should then adapt the General Technical Specifications to the particular procurement.

Care must be taken in drafting specifications to ensure that they are not restrictive. In the specification of standards for equipment, materials, and workmanship, recognized Philippine and international standards should be used as much as possible. Where other particular standards are used, whether national standards or other standards, the specifications should state that equipment, materials, and workmanship that meet other authoritative standards, and which ensure at least a substantially equal quality than the standards mentioned, will also be acceptable. The following clause may be inserted in the Special Conditions of Contract or the Technical Specifications.

Sample Clause: Equivalency of Standards and Codes

Wherever reference is made in the Technical Specifications to specific standards and codes to be met by the goods and materials to be furnished or tested, the provisions of the latest edition or revision of the relevant standards and codes shall apply, unless otherwise expressly stated in the Contract. Where such standards and codes are national or relate to a particular country or region, other authoritative standards that ensure substantial equivalence to the standards and codes specified will be acceptable.

Reference to brand name and catalogue number should be avoided as far as possible; where unavoidable they should always be followed by the words “*or at least equivalent.*” References to brand names cannot be used when the funding source is the GOP.

Section VII. Technical Specification

TERMS OF REFERENCE

I. PROJECT TITLE:

DOCUMENT CONVERSION TO DIGITAL FORMAT OF AUDITED FINANCIAL STATEMENTS (AFS) AND GENERAL INFORMATION SHEET (GIS)

1. PROVISION OF SERVICES TO INCLUDE MANPOWER AND DATA ENTRY WORKSTATIONS TO RECEIVE DOCUMENTS FROM SEC ELECTRONIC RECORDS MANAGEMENT DIVISION (ERMD) DURING THE PEAK PERIOD
2. DOCUMENT CONVERSION TO DIGITAL COPIES (AFS AND GIS)

II. OBJECTIVE OF THE PROJECT:

With the voluminous documents received from Public/Filers during the peak period of filing of reports there is a need to ensure that these documents are easily retrievable using SEC Iview Facility, not only to SEC staff, but to the public as well. Therefore, there is a need to convert into digitized copy, the reports and other documents received by SEC during the peak period and allow faster retrieval by the public and the SEC Staff.

III. RATIONALE:

Section 141 of the Corporation Code of the Philippines requires a corporation, lawfully doing business in the Philippines, to submit to SEC an annual report of its operations, together with a financial statement of its assets and liabilities covering the preceding fiscal year. The report shall be submitted within the prescribed period to SEC. In view of the deadlines imposed on the filing of these reports, there is a surge in the submission of annual corporate reports every year.

While current facilities and manpower of the SEC can handle the submission of regular reports from listed corporations and documents from new registrants (corporations and partnerships), these resources are not sufficient to handle the volume of reports filed during the year. Experience prior to 2002 showed that encoding and sorting of these reports by CRMD prior to scanning and filming by the Micrographics Unit took more than eight (8) months to convert these reports to microfilm and digitized forms. Thus, the delay in document conversion had significantly hampered SEC's delivery of services to the public requesting for copies of these reports.

To address the problem, the SEC since 2002 approved the outsourcing of document conversion. The outsourcing services resulted in the availability of all documents for viewing and use by the public and SEC staff within 30 days from receipt. The faster conversion of documents translated into significant improvement in the delivery of public service by

reducing public waiting time and resulted in an increase in revenue for the Public Reference Unit (PRU).

IV. SCOPE OF THE PROJECT:

The proposed outsourcing project will handle the provision of manpower and workstations as well as conversion to digital format of AFS/GIS and other pertinent documents received during the peak period.

A. ESTIMATED VOLUME:

Data from the SEC Iview Facility showed that an estimated 6,000,000 pages would compose the volume of documents for conversion.

B. Resources to be provided should include the following:

Provision of Manpower, Workstations and printers, which will be used during the receiving of documents. Because of the increased projected volume and the recommended set-up, the service provider may be required to provide a minimum of two (2) scanners (at least 140ppm), two (2) printers, ten (10) Workstations that are compatible with our existing facility both in SEC Iview and Computer Assisted Paper Submission and the corresponding Data Encoders per WS (1:1). Service provider shall provide 2 IT personnel to ICTD to assist in the uploading of digitized document to SEC iView Facility/iView Back-up and to assure SEC that all converted documents are delivered for the week and uploaded within the same week.

C. Indexing of Fields for efficient retrieval. The indexing fields are: SEC Number, Company Name, Form Type, Period Date, CD Number, Roll Number, Blip Number, Start to End pages, Number of pages. However, under Exception Handling, the Number of Index Fields may increase with the inclusion of Remarks (reason for the inclusion in the exceptional log

D. Other supplies and consumables needed such as batch control sheets, compact disks, toner etc.

E. Project Team/Organization:

POSITION	TOTAL NUMBER
Project Manager	1
Team Leader	1
Skilled and Quality Assurance Personnel	2
Skilled Data Encoder	18
Receiving Officer	2
Document Preparer	8
IT Personnel/Scanner Operator	2
Utility Personnel	1
TOTAL	35

V. PROJECT DURATION:

Maximum of SIX (6) months from the Date of Receipt of the Notice to Proceed. The transmittal of converted documents to digital format to SEC staff (project team) shall be done on a weekly basis. The minimum output requirement is 250,000 pages per week or 50,000 pages per day.

VI. SCOPE OF SERVICES:

The proposed outsourcing project includes the winning Service Provider to handle tasks from Document Receipt, Data Encoding, uploading to SEC IView of digitized documents and Conversion to digital format of AFS/GIS and other pertinent documents from period April to September at the SEC Electronic Records Management Division (ERMD) under ICTD and/or other area designated by SEC.

A. 1 CONTRACTOR/SERVICE PROVIDER

1. The Service Provider should demonstrate its capability by conducting a Proof of Concept (POC) based on Section VIII of this TOR. SEC will issue a Certificate of Acceptance upon passing the POC process.

The prospective bidder shall bring to SEC, the required equipment (document scanner with speed of at least 140 pages per minute, workstation, CD, etc.) for conversion for the User's Acceptance Test on the POC output.
